

# tlhaq

Thank you for downloading the Klingon clock from Two Brothers Software. This PDF will help you use this program. 🏹

Tlhaq. 🏹

Requirements SDL, SDL\_Image. . Available for download here

<http://www.libsdl.org/download-1.2.php>. 🏹

This is a Klingon time piece. 🏹

It's not officially endorsed by anyone although I tried my best to make it according to the research I did on the Internet. I do not claim any accuracy – however I think I did pretty good. 🏹

Translating the numbers to text was interesting. 16:47 would translate as 16 hundred forty and seven hours (or so is my understanding) 🏹

This explains two things. First why Klingons eat at either even hours or at dawn. 🏹

Secondly why a you Klingon would rather die in combat that do complex math. 🏹

My main resource being: <http://klingonska.org/ref/time.html>  
Running Klingon Clock. Unzip the files.

The program runs via hotkeys.

S – toggles the text for seconds on and off.

F – Changes the Font

+/- changes the fonts size

C saves your configuration 🏹
